park maintenance and development program, this plan considered connectivity to, from and through these areas because the Plan is addressing trail needs for transportation, as well as a recreation and open space component of public services.

The buildout of the planned and proposed trail network will improve trail access for most all of the municipalities within the county\textsuperscript{10}. It will also create new access to the countywide network for fifteen communities that have minimal or no trail access today.

\textsuperscript{10} All of the municipalities except Eagle Harbor which is in the southeast corner of the County, where share use path development is not possible using M-NCPDC funds, and the need for such trails is very low.
